Area: 7.3 stones/ft²
80 stones/m²
Thickness: 2-3/8" (60mm)

Standard

Length: 8-7/8" (225mm)
Width: 4-7/16" (112.5mm)
Area: 3.7 stones/ft²
40 stones/m²
Thickness: 2-3/8" (60mm)

Double Standard

Length: 8-7/8" (225mm)
Width: 8-7/8" (225mm)
Area: 1.8 stones/ft²
20 stones/m²
Thickness: 2-3/8" (60mm)

** For best results, pavers should be installed from several pallets to ensure color consistency, especially with multi-color blends.*

While the colors shown here are represented as accurately as possible, they should only be used as a guide. Actual samples should be viewed before making a final color selection.

NOTE: Efflorescence is a whitish powder like deposit of calcium carbonate that may appear on the product. It is a natural by-product of the cement hydration process and is inherent in all concrete products. It will usually wash or wear off in the course of time. If you do not wish to wait for this natural process to occur, cleaners designed specifically for removal are available. Contact your local dealer. DO NOT USE MURIATIC ACID directly as it will damage the color. Efflorescence in no way affects the integrity of the product, and is not a cause for rejection. Cleaning and sealing can take place immediately after installation, weather permitting. If you've used Polymeric Joint Sand, instead of Abbotsford Concrete's Interlocking Paver Joint Sand, you must refer to the polymeric joint sand and/or sealer manufacturer's recommended application instructions.

6cm FULL PALLET QUANTITIES

Half Standard	Standard	Double Standard
89 sq. ft.	98 sq. ft.	98 sq. ft.
648 pieces	360 pieces	180 pieces

Note: Half Standard full pallets weigh 2,500 lbs (1,135 kg), Standard and Double Standard full pallets weigh 2,800 lbs (1,273 kg)
