

# Natural Basalt Block Benches

## Specifications:

### Basalt Block Bench

Ⓐ Typical Depth:	18" - 24"
Ⓑ Typical Length Range:	36" - 60"
Ⓒ Typical Height:	19" +/-
Typical Weight Range:	1500 - 2500 lbs

We can create this bench according to your specifications and requirements. We have found though, that a machine sawn 19" slab provides a comfortable seating height all the while proving stability with its sawn bottom.

⬇ Image shown below has sawn ends to allow for tight fit.

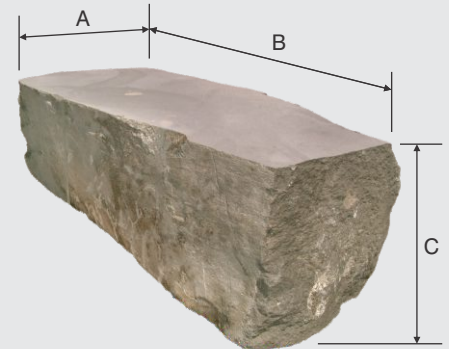

Basalt Block Bench

## Characteristics:

Our benches are made from indigenous Basalt locally quarried in the Squamish Basin of southwestern British Columbia. These benches feature natural weathering on all sides with some moss and lichen present. This stone is created by volcanic eruptions and may contain minor fissures.

## Description & Color:

Depending on the quarry source, our all natural Basalt Block Benches are mostly grey in colour with brown, gold and tan variations. Machine sawn top and bottom columns are used to create these stunning site furnishings. The smooth sawn top is typically blueish grey in colour.

## Packaging & Delivery:

Our Basalt Block Benches are typically packaged individually on wooden pallets or dunnage depending on weight.
